A unique magazine that reaches the toy and baby industry

Lek & Babyrevyn contains all conceivable information for everyone who works with toys and baby products. It is owned by the industry organization Swedish Toy and Baby Association and reaches almost everyone in the Swedish toy and baby industry. It also has some spread in the other Nordic countries. It is published 6 times a year and is an excellent tool to reach both retailers and suppliers in the toy and baby industry.

In Lek & Babyrevyn you can e.g. read about

Industry and personal news, new laws and regulations, trade fair reports and product news.

We do in-depth reportage about:

Stores, chains, e-commerce, wholesalers and manufacturers. Thanks to the collaboration within the International Toy Magazines Association and Baby Care Maga-

zines International, we also publish recurring reports from the international market. Issue 1 is distributed at the Spielwarenmesse in Nuremberg and issue 4 is distributed at the Kind + Jugend in Cologne. These issues are printed in larger editions.

We know that Lek & Babyrevyn reaches out widely in the industries and that it is read by many more than the recipient himself. We also know that information regarding new products/ranges must now be obtained more actively from the stores. That's why we have a section in the magazine where you as a supplier/distributor can show off your new products and sell them directly from Revyn! We now also provide space for job advertisements, as well as the opportunity to be seen with a banner in our digital newsletters. There is already the opportunity to present new employees and it remains.

NEWS in Lek & Babyrevyn!
